HOSPITAL REPORT.

Hanover, N. H., Feb. 18, 1914.

To the Selectmen of Lebanon, N. H.:

During the year beginning February 15, 1913, and ending February 15, 1914, the Gilman C. Whipple bed and the Lebanon bed in the Mary Hitchcock Memorial Hospital at Hanover have been occupied six hundred and fifty-three days.

During this time twenty-three residents of the town of Lebanon have been given the free use of these beds.

IDA FRANCES SHEPARD,
Superintendent.

During the year some much needed repairs and permanent improvements have been made in the building. All the old plastering in the front entry and stairways and on the back wall of the auditorium has been taken off, the lath renailed and plastered with lime mortar, a new hardwood floor laid in one of the entrys and hardwood treads put on one run of stairs. All the wood work in the auditorium and stairways has been thoroughly cleaned and painted one coat and all the

walls have been tinted, adding very much to the appearance of the inside of the building. The old post office room has been divided into two rooms, making an office for the Town Clerk in front and a County Commissioners' office and coat room, etc., in the rear. The Selectmen now occupy the office vacated by the Town Clerk, thus giving them a much needed second or consulting room, instead of the one small office they have formerly used. All the work has been done in a thorough and permanent manner.

Respectfully submitted,

GEO. U. L. LEAVITT,
Town Hall Agent.

REPORT OF BOARD OF HEALTH.

During the year there have been in Lebanon village 70 cases of measles, 10 cases of typhoid fever, six of which occurred in one house, due, probably, to some faulty local condition, and 14 cases of diphtheria in nine different families.

No fatalities occurred from any of the acute contagious diseases.

Many unsanitary places were remedied by the owners connecting with sewers, although considerable work of the same kind needs to be done the coming season.

In the whole town there were six deaths from tuberculosis.

In the west part of the town there have been 95 cases of measles and two of scarlet fever, compelling quarantine to be placed upon 32 dwelling places; two cases of typhoid fever, two of whooping cough. Eighteen complaints of conditions regarded as nuisances, aside from like conditions found by the board in looking after suspected and other locations as required by the Statutes, have been attended to. Six owners of dwellings near public sewer facilities have complied with Chapter 108 of the Public Statutes by connecting water closets and entering the sewers.

The large number of cases of measles during the year again suggest that more care should be taken by parents and guardians of children having coughs or colds, by keeping them at home, and away from other children and persons who have not had measles.

This disease appears to be most contagious during the coughing period at the beginning of the attack. A little extra care at this stage of the disease would not only lessen the severity of the attack, but would greatly lessen the danger of conveying the contagion to

others. It would also lessen the public expense of quarantine. The family physician should inform and counsel parents as to the time when individuals having hard colds could safely be permitted to mingle with the public.

The water supply for the village of West Lebanon furnished by the Hartford Water Company during the months of November and December 1913 occasioned much anxiety because of its being pumped from the Connecticut river to a small reservoir of spring water at the foot of Sargent's Ravine, and thence to the mains. The river water being forced through, rapid filters before being discharged into the reservoir.

The State Board of Health permitted this temporary supply, requesting that the hypochlorite treatment be constantly applied to the water before it was pumped into the mains. Frequent analysis of samples of the water taken from the river, the reservoir and from a tap in the village gave evidence of the good results of the hypochlorite treatment.

The local Board of Health, by direction of the State Board, made frequent visits of inspection to the plant, collecting samples of the water for analysis by the State Laboratory during the time of this temporary supply.

There were many cases of diarrhoeal intestinal troubles observed and reported to the board by persons using the water. Also one case of typhoid fever from which another member of the family evidently contracted the disease. How far or how much this was due to the water in question the board is not able to accurately state. However, the reports of the analysis of the water give sufficient evidence to warrant the extraordinary care taken by the Board of Health and the manager of the company to keep the temporary supply free of disease producing germs.

There is no question as to the purity of the water supplied to this village at the present time, as proved by analysis made January 5th, 1914.

Analysis made in October, 1913, of two samples of the water supply for the village of Lebanon gave evidence of excellent quality, yet it is our opinion that it would be well to add the hypochlorite process to the treatment of this supply as a final sufeguard.

The hypochlorite treatment has been adopted and thoroughly tried in many places. It has proved to be exceedingly efficient as a disinfectant of water, and is extensively used in conjunction with filtration as a final measure of precaution.

" town of Lebanon for pipe,	78 88	
		$703 33

Tne Cemetery Committee have expended a larger amount of money than in previous years owing to extraordinary expenses, and for the benefit of the tax payers will say that we have not received any funds from the town other than the amount raised for cemetery purposes The balance of the amount received, as shown in the foregoing report, being money derived from the sale of lots by the town and held subject to the call of the Committee and as is shown in the Selectmen's report, there is still a small balance in their hands due the cemeteries. We have paid the Selectmen for the materials received from the town the same as if purchased elsewhere.

In the spring of 1913 the Glenwood hill road was washed out by the surface water and in a few hours carried away what cost more than one hundred dollars to repair. The Committee were aware of this danger and to prevent its reoccurrence we have put in a partial system of sewerage, laid low enough in the ground so as not to interfere with sale of any lots, but on the contrary making salable and desirable many that were worthless before. The pipe is extended down the hill far enough with proper inlet, so we think we are well protected against another washout. The expense is not the only thing to be thought of, as there is at present but one approach to Glenwood Cemetery, and if this should be impassable it might cause serious inconvenience.

With the ordinary care and repair of lots and the extraordinary work done, our expenses have been large, but this is in the way of an explanation rather than an apology, as we were obliged to repair the roads and we consider the sewer a permanent and valuable asset.
